Restraint Slings Features and Uses

RESTRAINT SLINGS

- Comfortable and secure restraint is essential when investigations call for animals to be held in devices for any length of time
- LOMIR manufactures sling restraints for various applications and species

LARGE ANIMAL FRAMES

FRAME

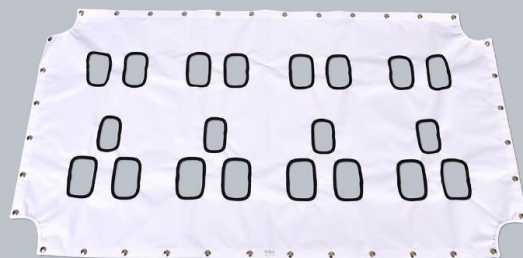

- The frame is constructed from 304 stainless steel 1" x 1" x .65" square tube. The complete frame is welded which provides a rigid construction. Dimensions for a standard frame are 24" wide x 36" long x 39" high. The frames are mounted on 5" diameter castors.
- The three foot length frame is suitable for dogs, mini-pigs, juvenile farm pigs and small ruminants.
- The four foot length frame being for large dogs, swine and farm animals.
- The deep "V" at the front of the frame allows easy access for instrumentation, sampling, administration and examinations.

LARGE ANIMAL FRAMES

SLING COVER

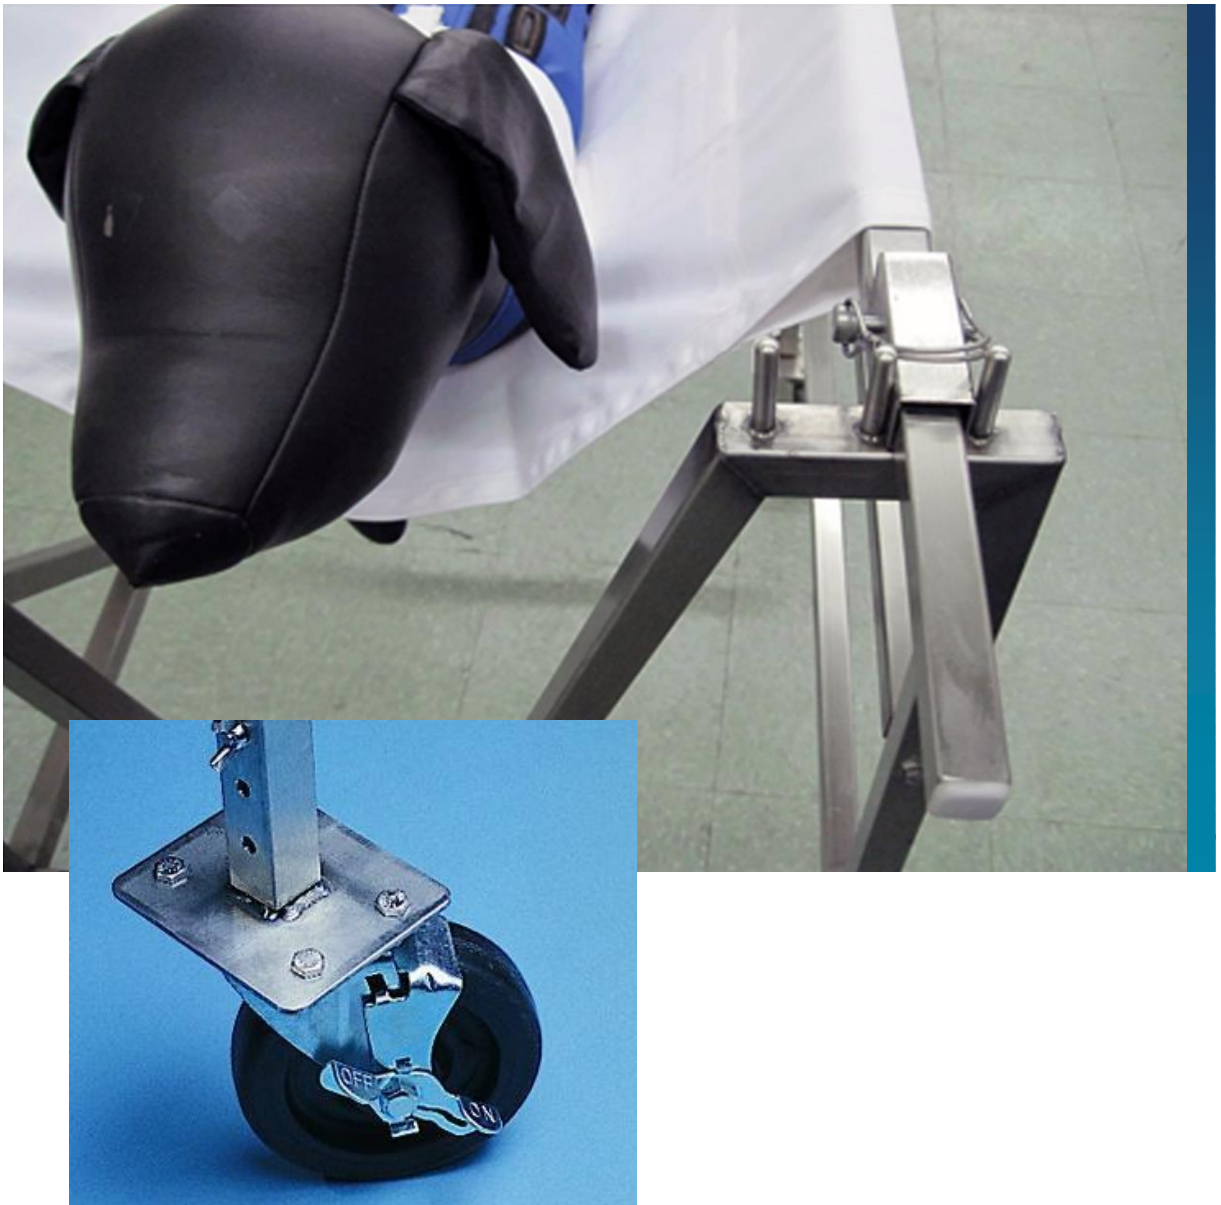

- The versatility of the frame is increased simply by having other sling covers on hand; covers are available for specific weight ranges and for a variety of species.
- The sling cover is made from a high quality coated canvas for durability. All openings and are edged in cotton jersey for comfort. Additional fabrics may be used for slings and custom features, such as openings for data recording can be added.

LARGE ANIMAL FRAMES

FEATURES

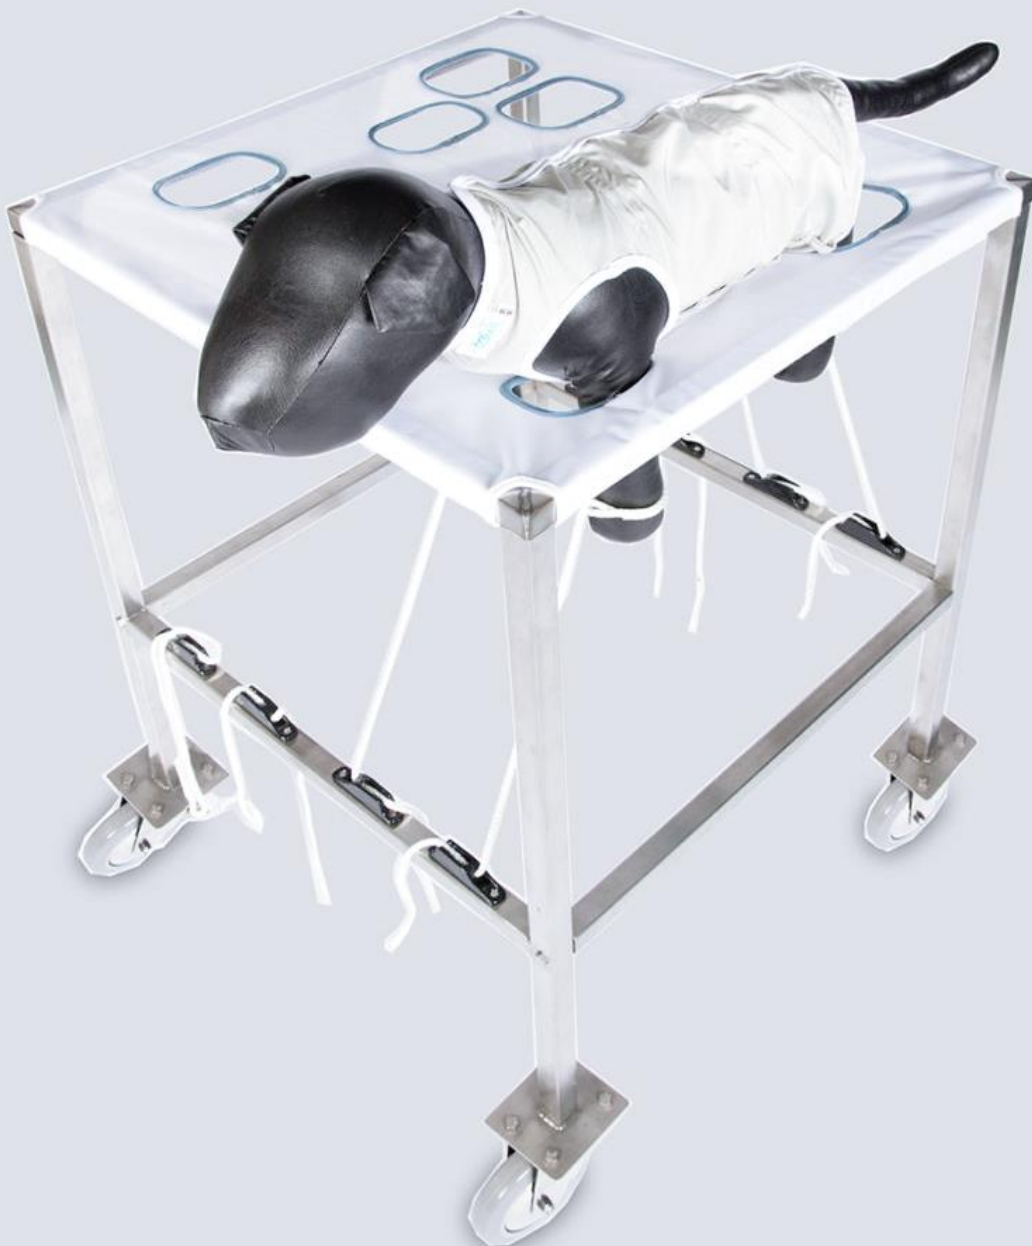

- The frame features two locking castors. Foot operation holds frame in place.

FLAT-TOP FRAMES

FRAME

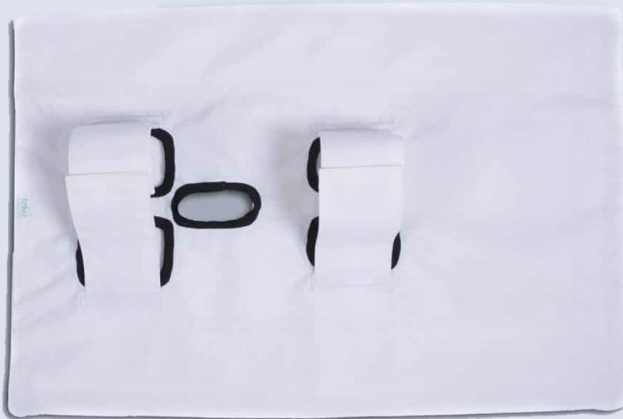

- For operations using multiple animal at any one time LOMIR manufactures multi-place slings. A flat-top design has the subjects placed into a taut sling cover in either two or four place configurations.

FLAT-TOP FRAMES

SLING COVER

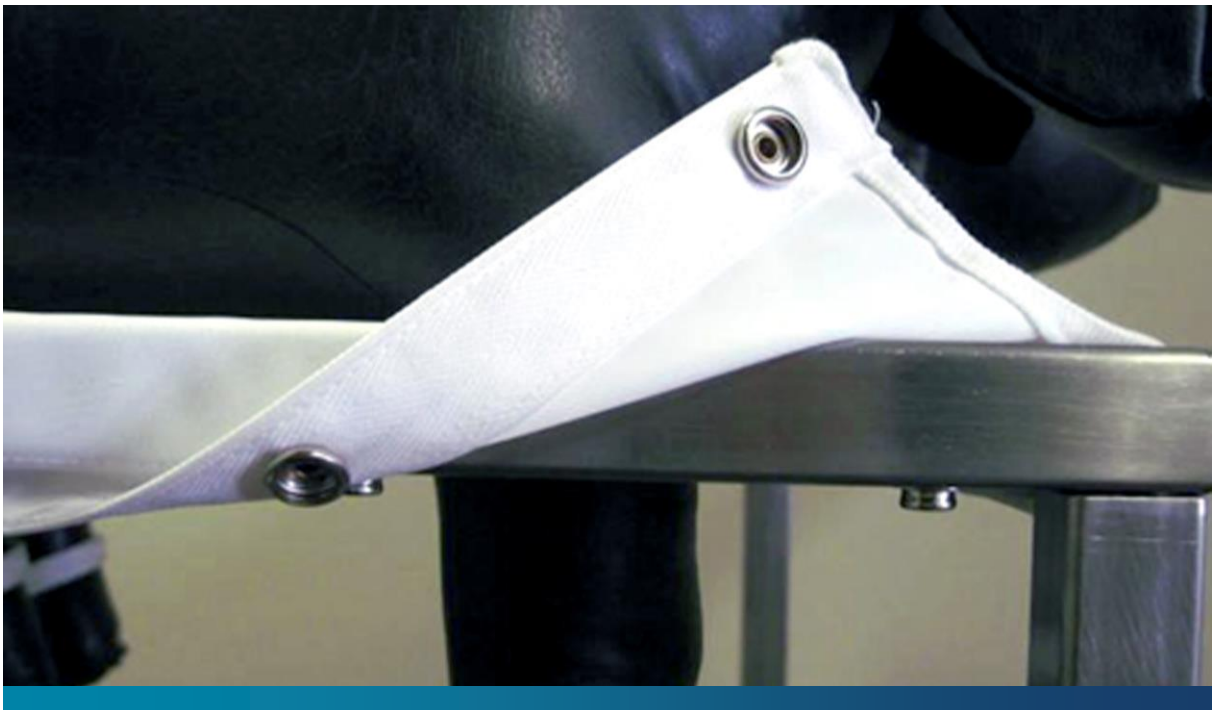

- Interchangeable sling covers are made for individual species.

FLAT-TOP FRAMES
